

Poverty Proofing© Healthcare for Link Workers in North Cumbria

Poverty Proofing© Healthcare Training

We understand that minimising the impact of poverty on healthcare provision is key to breaking the link between an individual's income and their opportunity to live a long, healthy life. Our Poverty Proofing© team experts can support healthcare teams to listen to the experiences of their patients, staff and stakeholders on how poverty impacts them. We can then provide tailored guidance, built on evidence and tested methods, on what actions can support improvement in areas such as access, participation, experience and long-term engagement.

What you will gain from the training

Staff will gain understanding and awareness about:

- How poverty is defined
- Poverty statistics in a national and local context
- The causes and consequences of poverty
- The unconscious bias and stigma surrounding poverty
- The link between poverty and health outcomes
- How organisational practices can create barriers to accessing healthcare
- Why a whole system approach is needed when addressing health inequalities
- How the lived experience of individuals can be used to inform change

Choose which date suits you best and use the following links to add to calendar

10th March 2026 9:30am-12:30pm

26th March 2026 12pm- 3pm
